

Environmentally Friendly Electricity

when you prioritise
renewable energy

Thank you for choosing renewable energy

You have chosen Environmentally Friendly Electricity in addition to your electricity agreement. Buying Environmentally Friendly Electricity makes the production of renewable energy more attractive as you buy electricity from renewable sources.

Energi Danmark offers:

- > Environmentally Friendly Electricity from wind turbines
- > Environmentally Friendly Electricity from hydropower plants
- > Environmentally Friendly Electricity from solar parks

Whether you buy energy that is based on wind, hydro or solar, your company is helping raise the demand for renewable energy. Your purchase includes guarantees of origin that correspond to your consumption. This ensures that the amount of electricity used by your company is covered using energy from renewable sources.

If you buy guarantees of origin that correspond to the entire electricity consumption of your company, your company can call itself carbon neutral.

The purchase of Environmentally Friendly Electricity from Energi Danmark alone does not lead to an increase in the production of environmentally friendly energy. But in the long term, the purchase of Environmentally Friendly Electricity could make it more attractive to produce energy in a way that takes the environment into account.

Energy sources used in the production of electricity

Your company has bought electricity from Danish solar parks. The electricity declarations for solar energy and general electricity can be found below. The calculations are based on guidelines issued by Energinet.dk.

Your individual electricity declaration

Emission of CO₂: 0 g/kWh

The 2022 General Electricity Declaration

Emission of CO₂: 433 g/kWh

Proof of purchase of Environmentally Friendly Electricity

Environmentally Friendly Electricity ensures that the guarantees of origin for renewable energy originate from Danish solar parks.

In connection with the auditing of the financial statements, Energi Danmark A/S's auditor, PwC, documents the balance between the Environmentally Friendly Electricity that is purchased and sold.

Company name	Address	Post code	City
Welltec A/S	Gydevang 25	3450	Allerød

Energi Danmark A/S hereby confirms that **Welltec A/S** has purchased its percentage of electricity consumption as Environmentally Friendly Electricity produced at Danish solar parks in the period between 01.01.2023 - 31.12.2023

Estimated consumption
4.576.000
kWh

Total CO₂ emissions associated with the purchase
0 g/kWh

The company has saved a total of
1,981 t of CO₂
with the purchase

The authenticity of the Environmentally Friendly Electricity is documented by Energi Danmark A/S's auditor, PwC.
